

# SAVE BACK INJURIES STOP ROLL DAMAGE NEW ROLL HANDLING DEVICE

## CAC® ROLL HANDLING DIVISION

Roll handling products from the web handling experts at CAC are the perfect answer for turning and transporting rolls safely and with zero roll damage. CAC® Rol-handIR™ offers many designs and options to suit any roll handling application. Our in house engineering department will design the perfect roll handling system to suit your needs. Please contact our application specialists for more information.

The L Roll Pivot Arm and Dual Overhead Hoist System (pictured above) offers many advantages:

- 360° North to South effortless roll rotation – to get your rolls where you want them
- True horizontal and vertical roll turning – eliminating the possibility of roll damage
- Rolls are gripped by the core – eliminating damage to the outer layers of material
- Two point, flexible suspension makes it easy for machine operators to use – so they will use it
- Simple mechanical core locking is super safe – the heavier your roll the harder it grabs
- Core locking cannot be disengaged while there is weight – making this unit very safe to use

# CAC® Roll Handling Division Offers More Material Handling Options for Safe Efficient Roll Maneuvering

## CONVERT YOUR FORK TRUCK INTO A SAFE, EFFICIENT ROLL-HANDLING VEHICLE THE EASY WAY: WITH THE CAC® FORK TRUCK ROL-HandIR™!

The patented CAC® Fork Truck Rol-handIR™ is the **SAFE** and **EFFECTIVE** way to place heavy rolls of material exactly where you want them. Designed for one-person operation, it is an efficient, cost-effective solution too – quickly and easily hooking up to your own fork truck, eliminating roll damage and preventing back injury. The Fork Truck Rol-handIR™ consists of 5 parts:

- The base framework-durable rectangular steel tubing that slides onto forks in 3 easy steps
- The roll & coil center lift-2 point flexible suspension enables easy alignment with roll core, impossible to disengage, handle lifts easily when release is desired positive gripping action in any core from 3" to 16" diameter
- The Lift 'N' Turn assembly-enables true horizontal & vertical roll positioning, grabs roll by core ID preventing material damage, designs available to turn roll in any direction
- 12V power pack-with built in 12-hour smart charger
- DC electric hoist-special heavy-duty load brake, roll turn cycle time less than 6 seconds

## LIFT 'N' TURN ASSEMBLY WITH ROLL & COIL CENTER LIFT

The CAC® Lift 'N' Turn assembly with center lift is the **SAFEST, MOST EFFECTIVE, COST EFFICIENT** and **DURABLE** way to lift, move, position and place rolls on the market today. The flexible 2-point suspension system allows for easy alignment with roll core I.D.'s from 3" to 16". An important safety design incorporated in the CAC center lift; it is impossible to disengage while supporting up to 1,000 lbs., yet the handle lifts easily when release is desired. The Lift 'N' Turn assembly enables true horizontal and vertical roll positioning, 360° North to South effortless roll rotation – to get your rolls where you want them. The Lift 'N' Turn grabs rolls by the core I.D. preventing material damage and designs are available to turn the roll in any direction.

## REMOTE HAND HELD OPERATOR CONTROLS – SIMPLE AND SAFE

This unique lightweight durable one-handed control is designed for "user-friendliness", allowing freedom of operator movement through cable lengths made for your requirements. Features include quick connect / disconnect connectors and durable rocker type switches to move rolls up and down. Ergonomically designed for a comfortable fit in most any hand.
